B.Tech

Pratap College Amalner

2017 - 2019

Science

HSC

Projects

ERP BI Report Generations (Higher Colleges of Technology), UAE January 2024 - Present

This project aims to will leverage the capabilities of Oracle Fusion ERP to create an efficient, reliable, and comprehensive reporting system. By providing real-time access to critical financial data, the organization can ensure better financial management, enhanced operational efficiency, and strategic decision-making

SQL, BI Report, Decision Making

Employees Management System

April 2024 - May 2024

🔗 [GitHub](#)

Designed and developed an Employees Management System using Django, enhancing employee record management, attendance tracking, and performance evaluation processes. Implemented user authentication, CRUD operations. Created a responsive frontend interface using HTML, CSS, and Bootstrap. Leveraged Django ORM for efficient database operations and utilized Git for version control, ensuring collaborative development and effective project management practices.

Django Framework, Python, HTML, CSS, Bootstrap
